

Indu-Matic & Foam Cleaner

Mobile foam cleaner made of stainless steel

Good adhesive foam, highly effective performance, on both horizontal and vertical surfaces – the ultimate equipment!

Professional equipment for daily use:

- Tank made of stainless steel, volume 20, 50 and 100 litres
- Large filling opening with snap closing
- Robust and flexible mixing unit to adjust the foam quality (from wet to dry)
- Compressed air valve connection with quick coupling
- Robust trigger assembly made of polypropylene and stainless steel with integrated fine filter
- Handy, stainless steel lance 45 cm
- Hoses 4, 6 and 8 m for large operation use
- Changeable from foaming to spraying

Additional security:

- Chemical resistant Viton gaskets
- Safety valve – useful for quick exhausting
- Pressure gauge
- CE- and TÜV-proved

Self contained Foam Cleaner:

- The integrated, electrical compressor makes this equipment independent from compressed air resources
- Fixed on a hand cart with protection hood for easy manoeuvring (electricity cable 8 m)

Typical applications:

According to the soiling grade a wet or a very dry foam may be applied. This equipment is used for the cleaning and disinfection of sanitary installations, such as shower cubicles, sanitary mountings, washbasins, toilets, walls, floors and ceilings in school houses, sport areas, swimming pools and camping installations. Also in restaurants, hotels, food and beverage industries (e.g. butchers, breweries), animal breeding and agriculture this solution is often used. If required, the Indu-Matic and Foam Cleaner can also be used for spraying disinfectant products, insecticides and rust remover as well as for rim, engine and chassis cleaning products in wash stations and workshops.

Noise level				76 dB (A)
Chemical resistances	Resistant against foaming and gel products based on acids, alkaline, surfactants as well as most disinfection products in concentrations recommended by chemical suppliers. These indications are not binding. If unsure, please ask your supplier or specialist.			

Foam Cleaning

Standard, fluid detergents have the tendency to run off fast from vertical surfaces and therefore have little chances to remove dirt easily without technical support. Foam and gel products have extended reaction times, because they adhere better. The advantage of this method is that there is almost no residue to remove manually after rinsing the surfaces. For the application of foam and gel products the mobile solution Indu-Matic and Foam Cleaner with integrated compressor are not only used by many small and middle sized customers but also by big users for the cleaning of niches and areas with difficult access. Equipped with the corresponding equipment, these units can also be used for spraying. Mainly the 50 and 100 litres tanks are installed fixed in car wash boxes to spray insect removers, rim, motor and chassis cleaners.
